PROFESSIONAL SUMMARY

Security-focused full-stack developer with hands-on experience across the MERN stack, Python, and Java, and a track record of progressing from security consulting into applied security research within a single year. Active bug bounty hunter on Bugcrowd, comfortable with OWASP Top 10 methodology, web and Android APK penetration testing, vulnerability assessment, and secure SDLC practices. CCNA and CEH certified, with AWS security certification in progress. Combines development fluency with an attacker's mindset to identify, document, and remediate real-world vulnerabilities.

PROFESSIONAL EXPERIENCE

ICT Security Attaché | State Department for Wildlife

May 2026 – Jul 2026

3-month industrial attachment, completed per official recommendation letter

- Supported the department's ICT team with day-to-day system and network security monitoring, assisting in the identification and escalation of potential vulnerabilities and access-control issues.
- Assisted in reviewing internal systems and workstations against baseline security configurations, documenting findings for the supervising ICT officer.
- Gained exposure to public-sector IT governance, asset handling, and incident reporting procedures within a regulated government environment.

Security Consultant → Security Researcher | KosamTech Technologies

Jan 2025 – Apr 2026

Progressed from Security Consultant to Security Researcher within the first year

- Performed vulnerability assessments and manual penetration testing on client web applications and internal systems, mapping findings to OWASP Top 10 and CWE classifications.
- Developed and hardened full-stack applications (MERN) with security-first practices — input validation, JWT auth, and dependency review — bridging development and security workflows.
- Progressed into a research-oriented role, contributing to internal write-ups on vulnerability classes and remediation guidance for the consulting team.

BUG BOUNTY & INDEPENDENT SECURITY RESEARCH

- Active researcher on Bugcrowd (bugcrowd.com/h/Th4_Hunt3r), conducting reconnaissance, vulnerability discovery, and responsible disclosure on web applications and Android APKs.
- Maintains a personal web security testing lab (Docker, OWASP Juice Shop, DVWA, Burp Suite) for continuous practice against OWASP Top 10 vulnerability classes.
- Builds and secures cloud environments (Docker, Kubernetes, AWS, Azure) to study container and cloud misconfiguration risks.

SELECTED PROJECTS

Web Security Testing Lab — Docker, Kali Linux, OWASP Juice Shop, DVWA, Burp Suite

- Containerized penetration-testing environment for practicing exploitation and remediation of common web vulnerability classes.

SIEM Implementation — Splunk, Suricata, Python

- Real-time intrusion detection setup with log analysis, alerting, and a monitoring dashboard for security event triage.

Legacy Core Banking System — Java, Spring Boot, MySQL, Thymeleaf

- Simulated core banking platform with account management, transaction processing, fund transfers, and loan calculation.

Car Wash Management System — React, Node.js, Express, MongoDB, JWT

- Full-stack MERN application with customer registration, service tracking, payment processing, and an admin dashboard.

Cloud Security Projects — Docker, Kubernetes, AWS,

- Deployed and hardened containerized workloads across AWS, applying orchestration and cloud-security best practices.

TECHNICAL SKILLS

- **Security & DevSec:** Penetration testing (web & Android APK), vulnerability assessment, OWASP Top 10 / OWASP IoT Top 10, CWE classification, SIEM (Splunk, Suricata), Burp Suite, network security, secure SDLC
- **Cloud & Infrastructure:** AWS, Azure, Docker, Kubernetes, Linux (Kali), CI/CD fundamentals, VLANs, firewalls
- **Development:** JavaScript/TypeScript, React, Node.js, Express, MongoDB (MERN), Python, Flask, Django, Java, Spring Boot, MySQL, PostgreSQL, Flutter
- **Tools & Practices:** Git/GitHub, Postman, Nmap, JWT-based auth, REST APIs, Agile collaboration, Caido, My-Hexray

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA)
- Certified Ethical Hacker (CEH)
- AWS Certified (in progress)

EDUCATION

Diploma in Computer Science — Zetech University

Expected completion: 18 December 2026
